Significant Achievement Gains Using the Effective Schools Model

We regret omitting Figure 1 from the article by Stephen K. Miller and others in the March 1985 issue. The figure, which shows impressive differences in reading and mathematics scores between control schools and project schools in Jefferson County, Kentucky, is available from Stephen K. Miller, Foundations of Education, University of Louisville, Louisville, KY 40292.

Writing for *Educational Leadership*

We welcome manuscripts on any aspect of curriculum, instruction, supervision, or leadership in elementary and secondary education. Authors are not paid for their contributions.

Papers should be written in direct, conversational style and be as brief as possible (five to ten double-spaced pages). References may be cited as footnotes or listed in bibliographic form at the end of the article. For examples of either style, refer to a recent issue or to Kate L. Turabian, *A Manual for Writers* (University of Chicago Press).

Double-space *everything,* including quoted material and references and footnotes.

We edit all manuscripts for brevity, clarity, and consistency of style, and send a retyped manuscript for the author's approval.

We do not return rejected manuscripts unless the author provides a self-addressed envelope with correct postage. We ask that authors submit two copies of their manuscripts to Ron Brandt, ASCD Executive Editor, 225 N. Washington St., Alexandria, VA 22314.
